Contents

Aalo V → De Groff D
Alimi AM → Plamondon R
Alkon DL → Werness SA
Almeida GL → Gutman SR
Andrews BJ → Heller BW
Angelaki DE: Spatial and temporal coding in single neurons 147
Angelaki DE → Hess BJM
Av-Ron E, Parnas H, Segel LA: A basic biophysical model for bursting neurons 87

Bässler U: The walking- (and searching-) pattern generator of stick insects, a modular system composed of reflex chains, and endogenous oscillators 305
Banzhaf W: Self-replicating sequences of binary numbers. Foundations I: General 269
Banzhaf W: Self-replicating sequences of binary numbers. Foundations II: Strings of length $N = 4$ 275
Barna G → Érdi P
Beckmann P → Fell J
Bertram R: A computational study of the effects of serotonin on a molluscan burster neuron 257
Blackwell KT → Werness SA
Bobbert MF → Soest AJ van
Brunelli R, Poggio T: Caricatural effects in automated face perception 235

Canal G → Schiff H
Cavonius CR → Siminoff R
Chang H-J, Ghosh J: Pattern association and retrieval in a continuous neural system 77
Chee-Orts M-N, Optican LM: Cluster method for analysis of transmitted information in multivariate neuronal data 29
Crespi B, Furlanello C, Stringa L: A memory-based approach to navigation 385
Cruse H, Steinkühler U: Solution of the direct and inverse kinematic problems by a common algorithm based on the mean of multiple computations 345
Cymerman A → Yamamoto Y

De Groff D, Neelakanta PS, Sudhakar R, Aalo V: Stochastical aspects of neuronal dynamics: Fokker-Planck approach 155
Dinse HR → Kopecz K
Doi S → Nomura T

Eckhorn R, Krause F, Nelson JI: The RF-cinematogram. A cross-correlation technique for mapping several visual receptive fields at once 37
Eigen M → Schober A
Ekeberg Ö: A combined neuronal and mechanical model of fish swimming 363
Érdi P, Grobler T, Barna G, Kaski K: Dynamics of the olfactory bulb: bifurcations, learning, and memory 57

Fallen EL → Yamamoto Y
Fam Quang Bac, Perov VL: New evolutionary genetic algorithms for NP-complete combinatorial optimization problems 229
Fay SD → Werness SA
Fell J, Röschke J, Beckmann P: Deterministic chaos and the first positive Lyapunov exponent: a nonlinear analysis of the human electroencephalogram during sleep 139
Fromherz P, Gaede V: Exclusive-OR function of single arborized neuron 337
Furlanello C → Crespi B

Gaede V → Fromherz P
Galiana HL → Rey CG
Georgopoulos AP → Lukashin AV
Gerstein GL → Xing J
Gerstner W, Ritz R, Hemmen JL van: Why spikes? Hebbian learning and retrieval of time-resolved excitation patterns 503
Ghosh J → Chang H-J
Golomb D, Guckenheimer J, Gueron S: Reduction of a channel-based model for a stomatogastric ganglion LP neuron 129
Goodhill GJ: Topography and ocular dominance: a model exploring positive correlations 109
Gorinevsky DM: Modelling of direct motor program learning in fast human arm motions 219
Gottlieb GL → Gutman SR
Grobler T → Érdi P
Guckenheimer J → Golomb D
Gueron S → Golomb D
Gutman SR, Latash ML, Almeida GL, Gottlieb GL: Kinematic description of variability of fast movements: analytical and experimental approaches 485

Hassan El-S: Mathematical description of the stimuli to the lateral line system of fish, derived from a three-dimensional flow field analysis. III. The case of an oscillating sphere near the fish 525
Hauske G: Editorial 5
Heller BW, Veltink PH, Rijkhoff NJM, Rutten WLC, Andrews BJ: Reconstructing muscle activation during normal walking: a comparison of symbolic and connectionist machine learning techniques 327
Hemmen JL van → Gerstner W
Hess BJM, Angelaki DE: Modelling spatio-temporal properties of directionally sensitive multi-input single-output systems 407
Houston CS → Yamamoto Y
Hreljac A, Martin PE: The relationship between smoothness and economy during walking 213
Hübner R: Different ways of modeling spatial-frequency uncertainty in visual signal detection 457
Hughson RL → Yamamoto Y
Hunter IW → Jones LA

Jones LA, Hunter IW: Influence of the mechanical properties of a manipulandum on human operator dynamics. II. Viscosity 295

Kamath MV → Yamamoto Y
Kaski K → Érdi P
Katayama M, Kawato M: Virtual trajectory and stiffness ellipse multijoint arm movement predicted by neural inverse models 353
Kawato M → Katayama M
Kimura S, Yano M, Shimizu H: A self-organizing model of walking patterns of insects 183
Kopecz K, Schöner G, Spengler F, Dinse HR: Dynamic properties of cortical evoked (10 Hz) oscillations: theory and experiment 463
Krause F → Eckhorn R
Kröller J: Reverse correlation analysis of the stretch response of primary muscle spindle afferent fibers 447

Lánský P → Rospars JP
Latash ML → Gutman SR
Leclerc F → Plamondon R

Lohmann R: Structure evolution and incomplete induction 319
Lukashin AV, Georgopoulos AP: A dynamical neural network model for motor cortical activity during movement: population coding of movement trajectories 517

MacGregor RJ: Composite cortical networks as systems of multimodal oscillators 243
Marder E → Skinner FK
Martin PE → Hreljac A

Neelakanta PS → De Groff D
Nelson JI → Eckhorn R
Nomura M: A model for neural representation of binocular disparity in striate cortex: distributed representation and veto mechanism 165
Nomura T, Sato S, Doi S, Segundo JP, Stiber MD: A Bonhoeffer-van der Pol oscillator model of locked and non-locked behaviors of living pacemaker neurons 429

Optican LM → Chee-Orts M-N

Pál KF: Genetic algorithms for the traveling salesman problem based on a heuristic crossover operation 539
Parnas H → Av-Ron E
Paulin MG: A method for constructing data-based models of spiking neurons using a dynamic linear-static nonlinear cascade 67
Perov VL → Fam Quang Bac
Plamondon R, Alimi AM, Yergeau P, Leclerc F: Modelling velocity profiles of rapid movements: a comparative study 119
Poggio T: In memoriam: Werner Reichardt 1
Poggio T → Brunelli R

Regan D → Regan MP
Regan MP, Regan D: Nonlinear terms produced by passing amplitude-modulated sinusoids through a hair cell transducer function 439
Rey CG, Galiana HL: Transient analysis of vestibular nystagmus 395
Rijkhoff NJM → Heller BW
Ritz R → Gerstner W
Röschke J → Fell J
Rospars JP, Lánský P: Stochastic model neuron without resetting of dendritic potential: application to the olfactory system 283
Rutten WLC → Heller BW

Sato S → Nomura T
Schiff H, Canal G: The magnetic and electric fields induced by superparamagnetic magnetite in honeybees. Magnetoperception: an associative learning? 7
Schober A, Thuerk M, Eigen M: Optimization by hierarchical mutant production 493
Schöner G → Kopecz K
Schwarz W: Coincidence detectors and two-pulse visual temporal integration: new theoretical results and comparison with data 173
Segel LA → Av-Ron E
Segundo JP → Nomura T
Shapiro AG → Zaidi Q
Shimizu H → Kimura S
Siminoff R, Cavonius CR: Simulated fovea of the human retina: psychophysical data confirming the model's ability to accurately predict resolution 475
Skinner FK, Turrigiano GG, Marder E: Frequency and burst duration in oscillating neurons and two-cell networks 375
Soest AJ van, Bobbert MF: The contribution of muscle properties in the control of explosive movements 195
Spengler F → Kopecz K
Steinkühler U → Cruse H
Stiber MD → Nomura T
Stringa L → Crespi B
Sudhakar R → De Groff D
Sutton JR → Yamamoto Y

Thuerk M → Schober A
Turrigiano GG → Skinner FK

Veltink PH → Heller BW
Vogl TP → Werness SA

Werness SA, Fay SD, Blackwell KT, Vogl TP, Alkon DL: Associative learning in a network model of *Hermissenda crassicornis*. II. Experiments 19

Xing J, Gerstein GL: A neural network model for texture discrimination 97

Yamamoto Y, Hughson RL, Sutton JR, Houston CS, Cymerman A, Fallen EL, Kamath MV: Operation Everest II: An indication of deterministic chaos in human heart rate variability at simulated extreme altitude 205
Yano M → Kimura S
Yergeau P → Plamondon R

Zaidi Q, Shapiro AG: Adaptive orthogonalization of opponent-color signals 415
